

Consent2Share Use Case: Sally Share

Use Case: Guest Client Without C2S

Sally lives in Maryland. She is in opioid addiction recovery and takes prescribed methadone on a daily basis. She wants to visit relatives for 2 weeks in California. She must make arrangements with her opioid treatment provider (OTP) to ensure that her methadone treatment will be uninterrupted.

It will take a lot of coordination and time to review and sign the proper paper forms before she can travel.

Sally's Local OTP

Out-of-State OTP

Use Case: Sally Share

Sally

Sally uses the online consent management application Consent2Share to give her Maryland OTP an advanced authorization to share her addiction treatment records with the California OTP.

Her methadone treatment will continue uninterrupted.
